

# TRC @ Englewood is Hosting a **Community Forum**

Wednesday January 31, 2007

5:00 PM until 8:00 PM

It is the start of a new year and a new political environment locally and nationally. We are looking forward to an exciting year of looking at the new challenges and seeking solutions together as a community. We will be working to encourage discussion of this years agenda and take suggestions on how we can improve on both our Community Forum and our Civic Lecture series. We will also offer a review of the out come of this past years election as it relates to local government, County government, state government and federal government and how we can participate more fully as citizens in our community.

## Remember

Our community forum allows the community to come together and gain access to information regarding the plans and projects that are currently going on in town as well as it's future plans. Our focus is on creating a place that accurate information can be shared and discussed in a safe environment. We have established a worksheet that we began to work with at our last meeting. We would like for everyone to fill this form in and bring it with them to this meeting for discussion as we are working to create action items to implement going forward. Join us as we meet again to fashion comprehensive and coordinated efforts to deal with the issues at hand:

- Construction Impact
- Traffic and city planning
- The Current & Future state of our local School System
- City Governance
- Eminent Domain

We look forward to a new year of working together to build a better community. We continue to ask previous participants to return with written ideas and suggestions as to action items that flow from our conversations. We look forward to welcoming everyone and building strong working relationship with each other.

*"The future is a direct result of the work we do today".*

*We will also be shooting a monthly television show the  
"Community Forum"  
to be aired on local cable television and the internet.*
